PROJECTS

EMPLOYEE MANAGEMENT SYSTEM

The Employee Management System is a system that helps the company to manage employee information. There are two kinds of users in the employee system. The first one is the admin, and the second one is a regular user, or employee. The admin can add, edit, delete, and view all employees' information. while regular users or employees can only edit and view their information.

Security features:

- Sanitizing users input.
- Hashing of sensitive data.
- Block users and auto-unblock users.

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

Nueva Ecija University of Science
and Technology

REKLAMOKO

Reklamoko is a complaint reporting system that helps residents easily complain using their computers or smartphone. It also makes it easier for the barangay officials to handle complaints.

Security features:

- Sanitizing users input.
- Hashing of sensitive data.
- Block users and auto-unblock users.
